Save your post press processing time!

Sakurai OLIVER-66 RCS Sakurai Rotary Complex & Converting System

Sakurai Oliver-66 RCS is a new innovative machine which “Die Cuts”, “Perforates in the Vertical or Horizontal positions” and “ creases” at high speeds.

In addition, Sakurai also offers numbering and imprinting capabilities as optional equipment. Oliver-66 RCS offers huge cost savings for post press processing work and increases production time and final delivery to your customers.

High speed, 10,000 sheets / hour ➤ Good for long run

Short run delivery demands ➤ No need to send jobs to outside sourcing

RSP System applies to Oliver-66 RCS ➤ Perforating, die cutting and creasing are very easy

Numbering and perforating can be done at same time ➤ Taking new job orders by proposing new products

Space saver ➤ Thanks to rotary complex design, machine size became small

Labor saver ➤ Printing press operator can run RCS

Saving inspection time ➤ Paper detectors are standard

Oliver-66 RCS together with numbering unit and RSP system will grow your business.

Preparing die cutting base of RSP system is off line work. Measure actual product and paste knife and creasing rulers on the base blanket.
